### **DETAILED ACTION**

The following action is in response to the amendment filed for application 10/828,265 on June 15, 2006.

#### ***Election/Restrictions***

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 3-7, directed to the species of transmission 2 are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim. Also, since claim 18 contains all of the allowed limitations of claim 1, claims 18-22 are also rejoined.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

#### ***Allowable Subject Matter***

Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the hydraulic control system for an automatic transmission with a wet clutch serving as a start element and points to be lubricated as claimed, and particularly including a first passage with a large-diameter orifice, a second passage with a small-diameter

orifice, a switching valve with switched fluid communication between the lubrication passage and the first and second passages, and including the remaining structure and controls of claims 1 and 18, respectively. The present invention also comprises of cooler arranged on the lubrication passage, an ECU that determines a temperature of the lubricating oil and controls the distribution cooler and the pressure controller in accordance with the determined temperature, and including the remaining structure and controls of claims 18 and 23, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
